

IT & Marketing February 2026 Report

The month of February 2026 focused heavily on infrastructure strengthening, network optimization, access control implementation, technical event support, and continuous power monitoring. Activities spanned program facilitation, network administration, hardware maintenance, router configuration, hotspot deployment, asset management, and large-scale event technical support. Emphasis was placed on improving network governance, restoring hardware functionality, enhancing learner accountability systems, and maintaining uninterrupted power supply. This report also outlines design, branding, communication, and digital media tasks completed in February 2026 at Ilorin Innovation Hub, strengthening IIH's communication materials (newsletter & email assets), promoting funding, training, and partnership opportunities, delivering seasonal and community engagement creative, maintaining brand consistency across programs and digital channels. Successfully amplified a Lagos-based AI conference, strengthened founder and entrepreneur positioning, increased cross-platform consistency, improved professional audience targeting and boosted credibility in AI ecosystem conversations.

Programs & Event Support

- Learn2Earn (Throughout the Month): Provided continuous technical support including system setup, participant assistance, troubleshooting, session monitoring, and hotspot authentication implementation.
- Learn2Earn Orientation: Supported onboarding activities through system preparation and access configuration for new participants.
- Innovate AI Conference Lagos 2026: Provided technical setup, system configuration, connectivity checks, equipment coordination, and troubleshooting to ensure smooth operations.

Network & Infrastructure Development

- Implemented organization-wide internet access restrictions to improve network efficiency, monitoring, and security.
- Worked alongside an external engineer to obtain administrative access to the Huawei router deployed by MTN and assisted in finalizing the internal network configuration.
- Configured the MikroTik router to support the Hub's workspace application, ensuring stable connectivity and optimized performance.

Hardware Maintenance & Technical Support

- Repair of six (6) desktop computers and two (2) staff laptops.
- Reduced system downtime and improved staff productivity through effective hardware maintenance.

Key Achievements

- Strengthened administrative control over the Hub's network infrastructure.
- Successfully deployed structured internet authentication for Learn2Earn participants.
- Finalized internal network configuration through router access and optimization.
- Restored eight (8) computing devices to full operational status.
- Improved asset accountability through device tagging.
- Maintained uninterrupted operations through proactive solar monitoring.
- Delivered reliable IT support across all supported programs and events.
- Developed updated IIH New Designs
- Designed official Screen Design assets, IIH Newsletter (1 & 2), IIH Newsletter Metrics graphic, IIH What to Expect graphic, IIH Insider design, IIH DBN 1 & DBN 2 graphics, Created Entrepreneurship Training Programme announcement design, Register Upskill & Pitch graphic, Grant/N100 Million funding graphic, Partnership design visual, IIH Demo Day graphic

Below is a full breakdown of events and campaigns covered:

1. DBN Entrepreneurship Training Program

Entrepreneurship capacity-building program focused on SMEs and founders.

2. Builders Path Session

Facilitated by: Emeka Ehinze

A strategic session for startup founders and builders.

3. Innovate AI Conference Lagos 2026

Theme: Responsible AI Beyond Innovation

A flagship innovation and AI thought leadership conference.

4. Ramadan Kareem Campaign

Community-focused seasonal engagement post.

5. Job Vacancies:

- Power BI & Analytics Specialist
- Power Platform Developers

6. Post-Event Success Recap

Responsible AI Beyond Innovation event recap content.
