

Q2 2025 BUDGET SUMMARY

This report provides a consolidated view of Q2 2025 expenses to support transparent and accountable disbursement of the IHS operational funds for the Ilorin Innovation Hub. The quarter's activities remained aligned with the Hub's broader mandate of fostering innovation, supporting local startups, and driving digital empowerment.

Two line items have been left at zero - Photography/Videography and Staff Professional Development. These are recommended for IHS consideration.

The second quarter of 2025 focused on consolidating operations and laying the groundwork for long-term program sustainability at the Ilorin Innovation Hub. During this period, the Hub incurred total expenses amounting to, comprising both recurring and one-time costs.

Majority of our recurring utilities are also being paid for the rest of the year, which is remaining a period of 8 months as one-time costs to ensure sustainability and avoid disruption in activities.

Key Highlights

Operational Expenses made up the bulk of the spending, with significant allocations to staff salaries, essential utilities, infrastructure maintenance, and key technology investments.

127,170,960

Only the MD and driver salaries have been incurred with a carryover from March. Interns were added in April but did not add significantly to the budget. The monthly Payroll for April is:

6,659,552 included in operational expenses

Building repairs also made a considerable addition as a recent rainstorm in Ilorin in April caused leakage on the roof which also damaged the LED screen in the main hall. Roof costs will be paid but deducted from Solar vendors retention.

5,837,000 included in operational expenses

We have recommended a budget Provision for Spare Parts for Solar, Electrical, Mechanical, LED Screens, as quoted by vendors managed by the Project Manager. We plan to attend Vivatech Paris in June 2025, with a 2-man delegation. The costs for this have been budgeted for.

10,735,000 included in operational expenses

Program Support initiatives included recurring community meetups, field engagements, and capacity development through staff training programs. One ecosystem event was held in March. We didn't host any ecosystem event in April but hosted a few external events such as UNILORIN Build with AI and a Womens empowerment event at no cost to us.

A portion of the budget was reserved for contingency and sustainability, including a 2% reserve fund allocation from inflows and a buffer for miscellaneous or unexpected costs.
