

AI-Ready Workforce Transformation Proposal for IHS Nigeria

*Prepared by Temi Kolawole
Managing Director, Ilorin Innovation Hub
August 26, 2025*

Document Outline

1. Executive Summary
2. Context & Rationale
3. Skills Mapping & Talent Gaps
4. Reskilling & Upskilling Strategy
5. Responsible AI in HR Operations
6. Role-by-Role AI Impact
7. Change Management & Culture Enablement
8. Roadmap & Operating Model (2025–2028)
9. KPIs, Benefits & Risks
10. Conclusion
11. Appendices

Executive Summary

Expected Outcomes:

- 20–30% faster HR and back-office processes.
- 10% workforce capacity redeployment through automation.
- Faster hiring cycle (8 → 6 weeks) and safer field operations.
- Compliance with NDPA 2023, Labour Act, PENCOM, and NCC guidance.

Context & Rationale

Why Workforce AI Readiness Matters Now

- **Nigeria's Workforce Realities:**
 - Uneven digital literacy across regions.
 - Limited access to advanced training outside urban hubs.
 - Active union structures requiring early engagement.
 - Infrastructure gaps (power, connectivity) affecting rollout.
- **Opportunity:** IHS Nigeria can lead in Africa by combining AI with responsible workforce transformation.

Skills Mapping & Talent Gaps

Current vs. Future Workforce Needs

- **Future Needs:**
 - **Leadership/Board:** AI-driven decision dashboards, scenario modeling.
 - **Middle Management:** Data literacy, AI-augmented planning & reporting.
 - **Field/Operational Staff:** Predictive maintenance tools, AR/AI-enabled workflows, safety monitoring.
 - **Back-Office Teams:** HR, finance & procurement automation.

Reskilling & Upskilling Strategy

Three-Tier Learning Framework (2025–2028)

Tier 1 – AI Awareness (All Staff):	Tier 2 – Data Literacy (Managers & Staff):	Tier 3 – Deep Technical Skilling (Select Cohorts):
Short modules on AI basics, ethics, and use cases in telecom.	Hands-on training in analytics, dashboards, and AI-supported planning.	Specialized programs in AI/ML, MLOps, and data engineering.

Delivery Model:

- Internal “AI Academy” for IHS Nigeria.
- Partnerships with Nigerian universities, hubs (CcHub, ALX, Decagon).
- Certifications from AWS, Microsoft, Google.

Investment & ROI:

- Training budgets in ₦ and US\$ scenario ranges.
- Payback: higher productivity, faster hiring, improved retention.

Responsible AI in HR Operations

Embedding AI into HR with Trust & Compliance

- **Priority Use Cases:**
 - Recruitment & candidate screening.
 - Internal mobility & succession planning.
 - Performance insights & workforce forecasting.
 - HR service chatbots for staff support.
- **Governance & Compliance:**
 - Align with **NDPA 2023/NDPR**, Labour Act, PENCOM, NCC guidance.
 - Human-in-the-loop for all critical decisions.
 - Bias detection, explainability, and appeal mechanisms built in.
- **Strategic Outcome:**
 - More efficient, fair, and data-driven HR processes.
 - Workforce trust strengthened through transparency & safeguards.

Role-by-Role AI Impact

Transforming Work Across All Levels

Leadership / Board	Middle Management	Field & Operational Staff	Back-Office Teams
AI dashboards for real-time decision-making & scenario modeling.	AI-augmented planning, reporting, and resource allocation. Data-driven performance tracking.	Predictive maintenance tools to reduce downtime. AR/AI-assisted workflows & safety monitoring.	HR, Finance, and Procurement automation. AI-enabled service chatbots for routine tasks.

Outcome

Every role benefits from AI — productivity gains, safer operations, and better decision support.

Change Management & Culture Enablement

Building a Workforce Ready for AI

Communication & Engagement	Culture & Trust	Capability Building
Clear, ongoing messaging on AI's role and benefits. Early engagement with unions and key stakeholders.	No-forced-layoffs principle; redeployment & reskilling first. Recognition & incentives for AI adoption champions.	"Day-in-the-life after AI" workshops per role. Local champions network to drive adoption.

Roadmap & Operating Model

Phased Transformation Journey

Phase 1 (0–6 months)	Phase 2 (6–18 months)	Phase 3 (18–36 months)
Skills mapping, AI awareness sessions. Pilot projects in HR operations & field tools.	Scale training across all tiers. AI dashboards integrated into management workflows. Certification of managers & technical staff.	Institutionalize AI through an innovation hub. Continuous learning & career pathways embedded. AI integrated into SOPs across functions.

KPIs, Benefits & Risks

Measuring Success & Managing Challenges

Key KPIs	Expected Benefits (Base Case):	Risks & Mitigations
Training completion & proficiency levels. AI tool adoption/utilization rates. Time-to-hire & time-to-productivity. Attrition & internal mobility rates. HR cycle-time reductions & safety incident rates. NDPA compliance audit results.	20–30% faster HR/back-office cycle-times. ~10% workforce capacity redeployed through efficiency. Hiring cycle reduced from 8 → 6 weeks. Safer, more reliable field operations.	Adoption resistance → targeted comms & incentives. Skills gaps → phased reskilling programs. Data privacy/regulatory risks → strong compliance controls.

Outcome

Balanced approach delivering measurable ROI while managing people and regulatory risks.

Conclusion

AI-Ready Workforce Transformation Plan (2025–2028)

- **What the Plan Achieves:**
 - Maps current vs. future workforce skills across all roles.
 - Defines a 3-tier reskilling & upskilling framework with Nigerian and global partners.
 - Embeds responsible AI practices in HR operations (fairness, compliance, transparency).
 - Outlines role-by-role AI impact to boost productivity, safety, and decision-making.
 - Provides a phased 12–36 month roadmap with KPIs, benefits, and risk mitigations.
- **Overall Outcome:**

A clear, pragmatic strategy to make IHS Nigeria's workforce **AI-ready, future-proof, and regionally competitive** while maintaining trust and compliance.
- **Next Steps:**
 - Secure HR leadership endorsement.
 - Launch **skills mapping & awareness pilots** within 6 months.
 - Formalize partnerships with training providers and regulators.
 - Establish an **AI Center of Excellence** to coordinate rollout.
