

AFRILABS CAPACITY BUILDING PROGRAMME (ACBP)

INTRODUCTION

Many promising African individuals and groups establish hubs to help build more sustainable and successful startups that are relevant in today's global economy. However, hub founders on the continent and their staff lack access to Africa-tailored content, models and best practices for hub management and startup support considering the unique and challenging African business environment. This makes it more difficult to deliver to their target demographic.

GAPS IDENTIFIED

Over the years, AfriLabs has carried out research on hub needs, capacity gaps and best practices of running successful hubs. Some key gaps identified include:

Inadequate funding for hubs and their startups

Inadequate technical resources

Inadequate support system/challenging regulatory environment

Inadequate requisite trainings and management skills by hub managers.

AFRILABS CAPACITY **BUILDING PROGRAMME** **(ACBP)**

AfriLabs has designed and is set to implement the AfriLabs Capacity Building Programme (ACBP); a 36 months intensive capacity building programme for hubs, funded by the French Development Agency (AFD). AfriLabs will be working with African Business Angels Network (ABAN), Afric'Innov, Strathmore University and member hubs across Africa to implement this programme.

ACBP **WILL INCLUDE:**

Hub orientation

30 Physical workshops in 15 convening African cities, in partnership with Afric'Innov and ABAN

12 Quarterly Hubs Learning Weeks - a series of peer to peer virtual capacity building webinars

Full Hub Management Certification Course in partnership with a major African University

Hubs-in-Residence at AfriLabs Annual Gathering 2020 and 2021

Toolkits on business development and investment management

SDG meet up grants - 2,000 Euros per selected hub

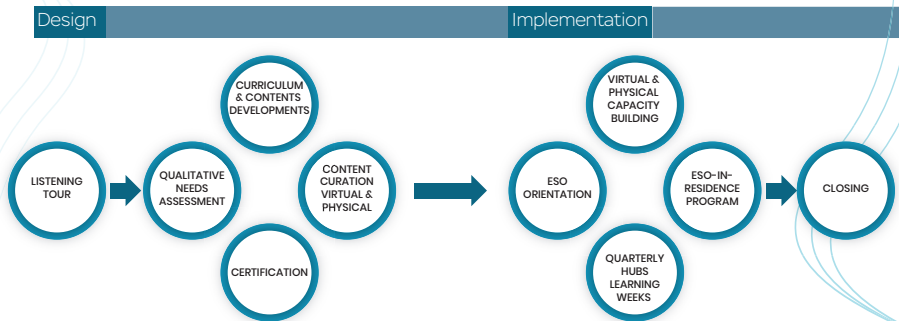

Capacity building awards (15,000 Euros per selected hub)

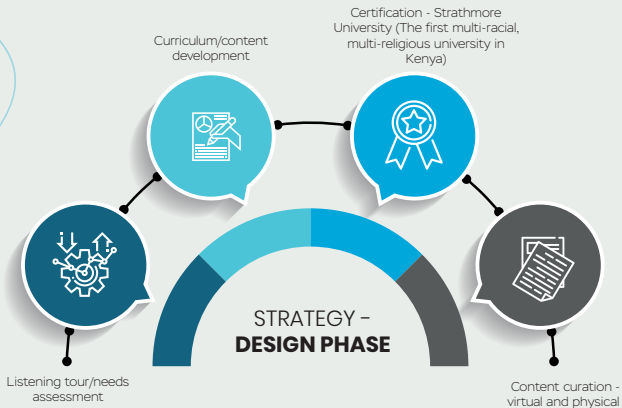

Travel sponsorships for Hubs-in-Residence, physical workshops, etc.

Physical workshops

4

PROJECTED **IMPACT**

- 600 hub managers across Africa trained online and via practical physical workshops
- At least 200 full certificates on Hub Management earned by hub managers and staff
- At least 1000 badges earned by hub managers and/or staff from completing part of or the full certificate
- At least 3,600 young innovators, entrepreneurs, developers and other stakeholders engaged during the SDG Meetups across 36 African cities
- Awareness of the ACBP and the impact of the work hubs do among at least 200,000 stakeholders of the African start-ups and innovation ecosystem
- Increased capacity of all participating hubs in key areas of their local economies.

PARTNERSHIP?

AfriLabs is open to partnerships from ecosystem players who share similar interest and goal of developing the capacity of African hubs, thus developing their community of startups and the ecosystem at large.

Partners are welcome to scale the Programme by supporting any of its components or by increasing the number of Physical Workshop locations, SDG Meetups, Capacity Building Awards, etc.
