

Ilorin Innovation Hub – Monthly Report

Submitted to: IHS Nigeria

Reporting Period: December 2025

Submitted by: Managing Director

Date of Submission: 21/01/2026

1. Executive Summary

December 2025 marked a strong and strategic close to the operational year at the Ilorin Innovation Hub, reflecting consistent programme delivery, operational stability, and deliberate end-of-year readiness. The Hub successfully delivered key ecosystem-building initiatives including Skills Swap, Ecosystem Sync, Builder's Path sessions (for talents and founders), and Mix & Mingle—collectively driving talent development, founder support, and community engagement. Total programme attendance for the month reached **429 participants** across physical and virtual formats, reinforcing the Hub's role as a central platform for innovation and collaboration in Kwara State and beyond.

Operationally, administrative, facility, and technical teams delivered seamless support to all activities through strong coordination, front desk and hospitality services, vendor and procurement processes, and consistent technical coverage. Facility operations were strengthened by critical power infrastructure upgrades, including full transformer commissioning, deployment of a 55KVA generator, installation of solar street lights, and a power changeover system integrating solar, generator, and utility sources. These upgrades significantly improved operational resilience despite intermittent power disruptions linked to solar PCS instability, which were effectively managed through manual resets and generator backup systems.

From a financial standpoint, the Hub recorded **₦7,386,500** in reportable income, driven by hospitality services, cafeteria operations, and facility rentals. Operational expenditure stood at **₦78,515,116.34**, reflecting major investments in staff costs, IT equipment and furniture procurement, and repairs and maintenance—positioning the Hub for improved capacity, service quality, and operational readiness in 2026.

Overall, December 2025 demonstrated the Hub's continued ability to deliver high-quality programming, sustain operational excellence, and close out the year with upgrades that strengthen long-term capacity and impact.

2. Programs & Events Report

Month Overview

December 2025 featured several key programs including Skills Swap, Ecosystem Sync, Builder's Path sessions, Mix & Mingle, and various partner-led initiatives.

Key Activities Conducted

Programme / Event	Format	Key Metrics	Focus Area	Outcomes / Impact
Skills Swap	Physical	85 participants	Knowledge Sharing	Facilitated peer-to-peer knowledge exchange through interactive skill-sharing sessions
Ecosystem Sync	Physical	90 participants	Ecosystem Development	Brought ecosystem actors together to reflect on progress, identify challenges, and shape shared priorities
Builder's Path (Talents)	Virtual	33 participants (Virtual)	Talent Development	Equipped talents with soft skills for communication, teamwork, emotional intelligence, and professional development
Mix & Mingle	Physical	201 participants	Networking	Facilitated reflection, relationship-building, and informal networking

				among ecosystem participants
Builder's Path (Founders)	Physical	20 founders	Startup Development	Supported founders with strategic thinking, business model development, and venture growth strategies

Participation Metrics

Metric	Value
Registration to Attendance Ratio	approximately 2:1
Total Programs Conducted	5
Program Formats	Physical & Virtual
Overall Monthly Program Attendance	429 participants (Virtual + Physical)

Projected Impact

Programs delivered in December contributed to ecosystem development, talent capacity building, and stakeholder engagement across the innovation community nationwide.

Upcoming Activities

Planning for January 2026 programs and events is underway.

3. Operations Report

3.1 Finances

December 2025 closed out the year with strong financial activity across both revenue generation and major operational investments. Total reportable income for the month was ₦7,386,500, driven largely by guest entertainment receipts, cafeteria revenue, and facility rentals. Operational expenditure for the month totalled ₦78,515,116.34, reflecting significant spending on staff costs, IT equipment and furniture procurement, and repairs and maintenance. This resulted in a net operational position of ₦-

71,128,616.34 for the month. KAIS-related payments of ₦20,075,000 were also recorded separately for transparency and were not included in operational expenditure totals.

Income Breakdown – December 2025

Category	Amount (₦)	Notes
Facility rentals	₦950,800.00	Hall and space usage fees
Guest entertainment (income)	₦4,781,900.00	Catering receipts, drinks sales, profit sharing
Cafeteria revenue	₦1,653,800.00	Cafeteria operations revenue
Total Reportable Income – December 2025	₦7,386,500.00	Excludes restricted funding and internal movements

Expenditure Breakdown – December 2025

Category	Amount (₦)	Notes
Staff salaries & wages	₦26,673,666.34	Salaries, allowances, statutory payroll items
IT equipment & furniture	₦42,685,500.00	Equipment and furniture purchases
Repairs & maintenance	₦9,155,950.00	Facility and equipment maintenance
Total Operational Expenditure – December 2025	₦78,515,116.34	Excludes KAIS-related expenses

Financial Summary – December 2025

Category	Amount (₦)
Total Reportable Income	₦7,386,500.00
Total Operational Expenditure	₦78,515,116.34
Net Position	₦-71,128,616.34

Category	Amount (₦)	Notes
Events & Conferences – KAIS	₦20,075,000.00	Payments to PBN Solutions for summit planning and execution (shown for information purposes only)

Note: KAIS-related transactions are shown above for information purposes only and are not included in operational expense totals.

3.2 Cafeteria Operations & Profit Sharing (IIH Cafeteria)

Overview

The cafeteria operations continued to serve staff, visitors, and event participants throughout December 2025.

Profit & Loss Summary – December 2025

Category	Amount (₦)
Revenue	₦1,653,800.00
Cost of Sales	₦1,424,360.00
Gross Profit	₦229,440.00

3.3 Administration

December was a highly productive and operationally smooth month at the Ilorin Innovation Hub. Administrative operations ran efficiently, with hospitality and cafeteria services consistently meeting daily requirements. No major operational disruptions were recorded.

Front Desk & Visitor Management

The team strengthened front desk professionalism through continuous staff training. Cafeteria operations improved through better inventory tracking, vendor performance monitoring, and cost optimization. Vendor management and payment processes were also enhanced, enabling faster invoice processing, stronger supplier relationships, and more efficient logistics and procurement.

Event & Partner Support

Administration worked closely with the Technical and Facility teams to support smooth event delivery, accurate scheduling, and timely calendar updates. Hospitality support was provided through refreshments, materials coordination, on-site assistance, timely setup, and post-event breakdown.

Facility, Vendor & Procurement Management

The team supervised janitorial services and ensured readiness of meeting rooms, VIP lounges, and private workspaces. Office supplies and consumables were procured

proactively to prevent shortages, while vendors were engaged to ensure timely delivery. Invoices were reviewed and processed promptly, maintaining strong relationships with long-term service providers.

Events Coordinated (December)

1. December 6 – Meet the Leaders (Pitch Hall)
2. December 11–12 – Animation Training (WS2)
3. December 13 – Multiple Events
4. December 16 – Kwara State Youth Leadership Programme (Day 1)
5. December 17 – Kwara State Youth Leadership Summit (Day 2)
6. December 18 – DSS Insecurity Awareness Event

Key Outcomes

Administration maintained structured communication with clients and partners, supported strong inter-departmental coordination, and ensured consistent facility cleanliness and ambience throughout the festive peak period.

Recommendation

Deploy temporary or dedicated support staff for inventory handling and logistics during large-scale events to improve operational flow and reduce turnaround time.

Conclusion

The department remains essential to operational excellence, stakeholder support, and seamless coordination. In December 2025, the team demonstrated adaptability, commitment, and efficiency, and is well-positioned to drive continuous improvement in the year ahead.

3.4 Human Resources (HR)

Overview

During December 2025, as part of Q4 2025 activities, the Human Resources Department sustained effective operations with a focus on workforce expansion, staff welfare, performance oversight, and statutory compliance.

Key Workforce Updates

The organization maintained a total workforce of 28 staff members as at the end of Q4 2025. Key HR activities during the quarter included:

- Onboarding additional NYSC corps members
- Engagement of new contract staff
- Completion of Finance personnel recruitment

HR Operations and Performance Management

HR continued to support the organization through:

- Timely payroll administration and benefits management
- Accurate documentation and record-keeping
- Staff coordination and internal communication support for management
- Ongoing performance monitoring across departments

Overall departmental performance remained satisfactory throughout the period.

Workforce Snapshot (December 2025)

- Permanent staff: 16
- Contract staff: 3
- NYSC corps members: 6
- Interns: 3
- Total workforce: 28

3.5 Facility

Overview

December 2025 marked a strategic close to the operational year at Ilorin Innovation Hub (IIH), featuring selective programmes, critical power infrastructure upgrades, and facility assessments to support future expansion and prepare for the annual year-end shutdown. The month ended successfully with the Hub shut down on **December 23rd, 2025** after final inspections and security handover.

Programmes and Operational Support

The Facility Department supported multiple programmes through hall setup, power distribution, sound system support, janitorial coverage, and security oversight. Key activities included:

- **December 6:** Meet the Leaders (Pitch Hall)
- **December 11–12:** Animation Training (WS2)
- **December 13:** Multiple Events (including AWS Student Competition, ProdAcademy Graduation, IIH Mix & Mingle)
- **December 16–17:** Kwara State Youth Leadership Programme and Summit
- **December 18:** DSS Insecurity Awareness Event (controlled access and security-sensitive setup)

Power and Infrastructure Improvements

Facility works in December focused heavily on improving power stability and operational flexibility. Key achievements included:

- Full commissioning of the **electrical transformer** (improving power stability)
- Delivery, testing, and commissioning of a **55KVA JMG generator**
- Installation of **six (6) solar street lights** to improve visibility and security
- Installation of a comprehensive **power changeover system** integrating solar, generator, and utility power sources

Facility Assessments and Workspace Planning

Facility inspections and professional assessments were conducted to support expansion planning and capacity improvement:

- Joint inspection focused on space optimization, furniture adequacy, and planning for increased user numbers
- Detailed measurements and spatial analysis for future workspace reconfiguration and furniture placement
- Carpentry audit carried out on the final day, including measurements for Big Hall backdrop replacement and identification of woodwork repairs scheduled for January execution

Janitorial and Security Operations

Janitorial and security operations remained effective and incident-free:

- Daily cleaning across offices, halls, restrooms, and outdoor areas, including event-specific cleaning support
- Controlled access and enhanced security support during sensitive events
- Facility secured for annual shutdown following final inspections and formal security lockdown

Key Challenges Managed

- Solar PCS instability created intermittent power disruptions; mitigated through generator backups and manual resets.
- Capacity constraints and need for space optimization identified during inspections.
- Landscape dryness during Harmattan highlighted the need for improved dry-season irrigation and structured landscape management.

Key Outcomes

- All December programmes successfully supported
- Major power infrastructure upgrades completed (transformer, generator, changeover system)

- Solar street lighting installed to enhance security
- Space planning and facility assessments completed for future expansion
- Hub shutdown executed successfully on **December 23rd, 2025**

Recommendations

Key actions to strengthen reliability and readiness include:

- Conduct a full technical audit of the solar PCS to resolve recurring faults.
- Implement space reconfiguration and furniture upgrades based on professional assessment outcomes.
- Execute carpentry repairs and Big Hall backdrop replacement based on audit measurements.
- Establish routine maintenance schedules for transformer, solar, and generator systems.
- Implement structured dry-season landscape management (irrigation, soil conditioning, drought-resistant grass).
- Conduct pre-reopening inspections prior to January resumption.

3.6 IT & Marketing

Overview

In December 2025, the IT & Marketing function maintained strong operational stability while sustaining consistent content delivery to support Hub programs and visibility. Core systems performed reliably throughout the month, with high uptime levels and stable network usage. The unit also provided seamless technical support for key programmes and delivered multiple design assets to strengthen engagement and promotion across events.

Infrastructure, Systems & Network Performance

Technology operations remained stable across all essential systems, with a focus on reliability and proactive monitoring. Key highlights included:

- System uptime and network performance maintained at 99.9%
- Cloud services delivered within expected performance benchmarks
- Average network load remained stable, with peak utilization at 40%
- Surveillance system storage was monitored and optimized to sustain efficiency

- Renewable energy systems were optimized and maintained to improve power support reliability

Technical Support & Execution

The team delivered comprehensive, zero-failure technical support across high-profile events and programmes, ensuring smooth delivery and uninterrupted operations.

Key engagements included:

- **IIH x CcHUB:** Continuous technical support, workstation preparation, and connectivity management
- **Learn2Earn Participants:** Continuous technical support to sustain programme delivery

Brand & Content Momentum

Marketing output remained active through timely design and communications support for key programmes and community events.

Design deliverables produced during the month included:

- Promotional assets for the **IIH Accelerator Programme** (flyers, benefits cards, key dates)
- Official event flyers for key community activities including **Skill Swap**, **Ecosystem Sync**, and **Mix & Mingle**

3.7 Managing Directors Office

The Managing Director's Office continued to provide strategic leadership and oversight throughout December 2025. Key activities included coordination of major programs and events, stakeholder engagement, strategic planning, and organizational management to ensure effective execution of IIH's mission and objectives.

4. Conclusion

December 2025 concluded a productive year for the Ilorin Innovation Hub, showcasing sustained operational excellence, strong internal coordination, and consistent programme delivery. The month reinforced the Hub's commitment to talent capacity building, ecosystem development, and stakeholder engagement, with multiple successful programmes executed and supported through effective administrative, facility, and technical operations.

Despite intermittent power challenges caused by solar PCS instability, the Hub successfully maintained continuity through proactive management, while implementing major upgrades that significantly strengthened infrastructure resilience and readiness. These improvements, alongside facility assessments and procurement to increase workspace capacity, position the Hub for stronger service delivery and operational stability in the coming year.

Financially, the Hub maintained steady income generation across its key operational streams while executing strategic spending aligned with growth and capacity strengthening. With the foundations consolidated through December and across 2025, Ilorin Innovation Hub is well positioned to expand its programming, deepen ecosystem impact, and drive innovation-led development across Kwara State in 2026.
