

Ilorin Innovation Hub – Monthly Report

Submitted to: IHS Nigeria

Reporting Period: November 2025

Submitted by: Managing Director

Date of Submission: 15/12/2025

1. Executive Summary

November 2025 represented one of the most intensive and consequential months at the Ilorin Innovation Hub, marked by the successful delivery of the Kwara AI Summit 2025 alongside a dense calendar of ecosystem, enterprise, and talent development programmes.

During the reporting period, the Hub engaged over 2,000 participants across physical and virtual engagements, convening innovators, policymakers, startups, ecosystem partners, students, and development organisations. Flagship activities included the Kwara AI Summit, Ilorin Innovation Challenge and Hackathon, Digital Health Summit, Pre-Incubation and Incubation Residency, and multiple technical and creative training programmes. Collectively, these initiatives signalled a clear progression from awareness and convening into implementation, funding deployment, venture readiness, and pipeline development.

Operationally, the Hub sustained extended and high-volume facility usage while maintaining safety, cleanliness, and service quality. Strong cross-departmental coordination across Programmes, Facility, Administration, IT Support, and Human Resources enabled the seamless delivery of overlapping activities, large public events, residencies, and partner engagements.

From a financial perspective, routine operational expenditure remained within expected ranges when assessed independently of flagship event delivery. Kwara AI Summit-related expenses were deliberately ring-fenced to preserve transparency and ensure comparability with previous months. Supplementary income streams, including facility rentals, guest services, and cafeteria profit sharing, continued to grow in line with increased Hub utilisation.

Overall, November reinforced the Ilorin Innovation Hub's role as a central platform for innovation delivery, policy engagement, and talent development in Kwara State and beyond, while demonstrating operational maturity, financial clarity, and readiness for large-scale, multi-stakeholder convenings.

2. Programs & Events Report

Month Overview

November programmes focused on ecosystem activation, enterprise support, talent development, and policy engagement. Activities progressed beyond awareness into implementation, funding deployment, and venture readiness, while strengthening linkages between innovators, institutions, and investors.

Key Activities Conducted

Programme / Event	Format	Key Metrics	Focus Area	Outcomes / Impact
Kwara AI Summit 2025	Physical	1,500+ participants; 40+ speakers; hackathon, demos, and solution showcases	AI, Policy & Innovation	Strengthened Kwara's positioning as a credible AI hub; advanced policy dialogue alongside hands-on innovation
Ilorin Innovation Challenge & Hackathon	Physical	500+ applications; 27 teams selected; equity-free funding and incubation progression	Enterprise Support	Advanced early-stage ventures toward funding, incubation, and structured growth pathways
Pre-Incubation & Incubation Residency	Physical (5 days)	14 teams onboarded	Startup Development	Improved venture readiness through focused onboarding and refinement
Digital Health Pre-Summit	Physical	Stakeholder alignment session	Health Innovation	Strengthened ecosystem coordination ahead of the Digital Health Summit
Digital Health Summit	Physical	159 participants	Digital Health	Deepened collaboration between health-sector stakeholders and innovators
Builder's Path	Virtual	25 participants	Entrepreneurship	Improved practical application of AI for decision-making and productivity
Mix & Mingle	Physical	110 participants	Ecosystem Networking	Strengthened community ties and informal collaboration
Tech Talent Bootcamp (Piscine)	Physical	159 learners	Talent Development	Prepared participants for progression into a 24-month structured skills pathway
Animate Africa	Physical (Weekly)	273 creatives	Creative Economy	Supported animation and storytelling skills development

Participation Metrics

1. Total registrations: 3,311
2. Physical attendance: 2,019
3. Virtual attendance: 25
4. Total attendance: 2,044
5. Registration-to-attendance ratio: approximately 2:1

Projected Impact

1. Strengthened Kwara State's position as a credible AI and innovation hub
2. Advanced early-stage startups toward funding and incubation
3. Expanded technical and creative talent pipelines
4. Deepened collaboration between government, ecosystem actors, and innovators
5. Increased national visibility for the Hub and its programmes

Upcoming Activities

1. Accelerator application review and selection
2. Skills Swap Circle
3. Ecosystem Sync and Town Hall
4. End-of-Year Mix & Mingle
5. Continuation of technical and creative training programmes

3. Operations Report

3.1 Finances

Income Breakdown – November 2025

Category	Amount (₦)	Notes
Facility rentals	761,000.00	Hall and space usage fees
Guest entertainment (income)	4,883,100.00	Catering receipts, drinks sales, profit sharing
Total Reportable Income – November 2025	5,644,100.00	Excludes restricted funding and internal movements

Expenditure Breakdown – November 2025

Core Operations (Excluding KAIS)

Category	Amount (₦)	Notes
Staff salaries & wages	11,246,029.55	Salaries, allowances, statutory payroll items
Repairs & maintenance	2,690,400.00	Facility and equipment maintenance
Travel – Local	262,000.00	Official travel
Janitorial services	160,000.00	Routine and event-related cleaning
Security services	950,000.00	Net of reversals
Telephone & data services	506,000.00	Internet and telecoms
Guest entertainment (expenses)	5,421,200.00	Catering, refreshments, cafeteria supplies
Office supplies	150,000.00	Stationery and consumables
IT equipment & furniture	5,214,000.00	Sound and IT equipment purchases
Software & digital tools	26,805.36	Software subscriptions
Training & mentorship (non-KAIS)	200,000.00	General capacity building activities
Bank charges & fees	86,000.00	Aggregated transaction and maintenance charges
Total Operational Expenditure (Excluding KAIS)	27,912,434.91	Core monthly operating costs

Events & Conferences – Kwara AI Summit (KAIS)

KAIS-related expenses are reported separately to preserve clarity between routine operations and flagship event delivery.

Category	Amount (₦)	Notes
Events & Conferences – KAIS	50,000,000.00	Payments to PBN Solutions for summit planning and execution

Financial Summary – November 2025

November's financial activity reflected a high level of programme and operational engagement, alongside significant preparatory expenditure for a major flagship event. Routine operating costs remained within the expected range based on prior months,

while hospitality-related expenses tracked directly with increased event activity and partner engagements.

KAIS-related payments were clearly ring-fenced and did not distort the analysis of day-to-day operating performance. This separation supports transparency, comparability with previous months, and accurate interpretation of the Hub's underlying financial position.

3.2 Cafeteria Operations & Profit Sharing (IIH Cafeteria)

Overview

The IIH Cafeteria operates under a profit-sharing arrangement with a food service partner, supporting daily Hub operations and events by providing meals and refreshments to staff, members, event participants, and visitors.

Operating Structure

- Facility: Ilorin Innovation Hub Cafeteria
- Operating Partner: BOA Foods
- Profit Sharing Ratio:
- Operating Partner: 80%
- Ilorin Innovation Hub: 20%

Basis of Calculation

Profit sharing is calculated based on gross profit, derived as revenue minus cost of sales. Cost of sales represents the operating expenses directly incurred in food production and service (ingredients, preparation, and related consumables). No additional overheads are allocated beyond cost of sales.

Profit Sharing Summary (September – November 2025)

Month	Revenue (₦)	Cost of Sales (₦)	Gross Profit (₦)	IIH Share – 20% (₦)
September	708,600.00	616,600.00	92,000.00	18,400.00
October	3,132,100.00	2,745,400.00	386,700.00	77,340.00
November	10,055,245.00	5,461,200.00	818,000.00	163,600.00
Total (Sept–Nov)	13,895,945.00	8,823,200.00	1,296,700.00	259,340.00

Key Observations

- Cafeteria activity scaled significantly over the period, with November recording the highest revenue and gross profit.
- Increased usage aligns with higher programme density, events, and general Hub footfall.

- The profit-sharing model provides IIH with a growing supplementary income stream without direct management of food operations.

Conclusion

Between September and November 2025, the IIH Cafeteria generated a cumulative gross profit of ₦1,296,700.00. Based on the agreed profit-sharing structure, Ilorin Innovation Hub is entitled to ₦259,340.00 for the period. The cafeteria continues to support Hub operations while contributing incremental revenue linked directly to activity levels and utilisation.

3.3 Administration

Overview

The Administration unit supported all approved November activities through front-facing operations, hospitality coordination, facility request handling, and inter-departmental coordination, particularly during high-traffic periods surrounding the Kwara AI Summit.

Hospitality & Guest Management

- Supported event guests, speakers, partners, volunteers, and corporate visitors
- Coordinated refreshments and guest flow during large-scale events

Front Desk & Inquiries

- Managed reception and visitor coordination across programmes
- Responded to general inquiries and supported registration processes

Facility Use Requests & Client Communication

- Processed and coordinated facility usage requests
- Communicated availability, guidelines, and confirmations

Vendor & Procurement Coordination

- Liaised with service providers and vendors
- Supported procurement and service follow-ups

Finance Liaison

- Coordinated invoice generation for approved facility usage
- Supported client communication on billing confirmations

Cafeteria Oversight

- Supported refreshments and monitored order during peak periods

Key Challenges

1. High volume of concurrent events
2. Increased demand for real-time coordination
3. Vendor response delays during peak periods

Recommendations

1. Implementation of visitor management system and request tracking (in progress)
2. Standard hospitality checklist
3. Monthly Admin–Facility coordination walkthroughs
4. Additional support staff needed for proper efficiency

3.4 Human Resources (HR)

Overview

HR sustained effective operations across Q4, supporting staffing growth, payroll processing, and staff welfare.

Workforce Snapshot (Q4 2025)

- Permanent staff: 16
- Contract staff: 3
- NYSC corps members: 6
- Interns: 3
- Total workforce: 28

Key Activities

- Onboarding of new staff and corps members
- Payroll and statutory remittance processing
- HR documentation updates
- Performance and attendance monitoring

3.5 Facility Management & Infrastructure

Overview

November was an extremely high-intensity month for facility operations, dominated by preparations and execution of the Kwara AI Summit alongside multiple parallel programmes. The facility remained functional, secure, and clean throughout.

Key Maintenance & Operations

- Generator and power routing adjustments following blackout
- Elevator finishing works
- Solar system cleaning and inverter checks
- Plumbing repairs and AC servicing
- Pre-summit hall, lighting, sound and seating preparations

Janitorial & Security

- Continuous cleaning and deep-cleaning for halls and restrooms
- Traffic and crowd control during major events
- No major security incidents recorded

Challenges

- Power dependency and outages
- High waste generation during events
- Equipment strain during large-scale usage

Recommendations

- Routine solar cleaning and AC servicing
- Phased furniture upgrades
- Strengthened waste disposal schedule

3.6 IT Support

Overview

The IT Support & Content unit provided technical readiness and digital support for programmes and large-scale events, including the Kwara AI Summit.

Key Activities

- Technical support for programmes and summits
- Internet upgrade to improve connectivity and stability
- Surveillance system monitoring and optimization
- Renewable energy system maintenance
- Event visuals and Content support

External Engagement/Travel

- Representation at the **Afrilabs Annual Gathering** in **Nairobi, Kenya**, gaining exposure to best practices in hub operations and ecosystem development

3.7 Managing Directors Office

- Attendance at the Digital Nigeria Conference in Abuja, engaging with national stakeholders across government, technology, and digital economy institutions.
- Supervision of the two core arms of the organisation – Programmes and Operations – while continuing to perform the role of Director of Operations.
- Strategic engagement with stakeholders within and outside Kwara State to advance partnerships, programmes, and ecosystem collaborations.
- Oversight of responses to daily inquiries received via email and social media platforms, including partnership requests, job and internship placement inquiries, and facility usage requests.
- Reception of key visitors and partners, including guided tours of the Hub where available.
- Regular coordination meetings with Heads of Units to review work progress, address operational challenges, and track outstanding tasks.
- Ongoing strategic oversight and follow-up on post-Summit activities and outcomes.

4. Conclusion

November 2025 consolidated the Ilorin Innovation Hub's position as a credible and effective driver of innovation, enterprise support, and talent development. High participation levels across programmes reflected sustained trust from innovators, partners, and institutions, while the successful execution of the Kwara AI Summit demonstrated the Hub's capacity to host nationally significant convenings alongside practical, solution-oriented outcomes.

The month also underscored the strength of the Hub's internal systems and governance. Cross-functional teams supported heightened operational demands without compromising service delivery, infrastructure reliability, or organisational standards. Clear separation between routine operations and flagship event expenditure further strengthened transparency and financial accountability.

As the Hub transitions toward the close of the year, focus will shift to consolidating programme outcomes, onboarding accelerator cohorts, advancing venture pipelines, and sustaining momentum across technical, creative, and enterprise pathways. The progress achieved in November positions the Ilorin Innovation Hub to deliver enduring value for Kwara State's innovation ecosystem while deepening its national relevance and institutional partnerships.
