THE CHALLENGE

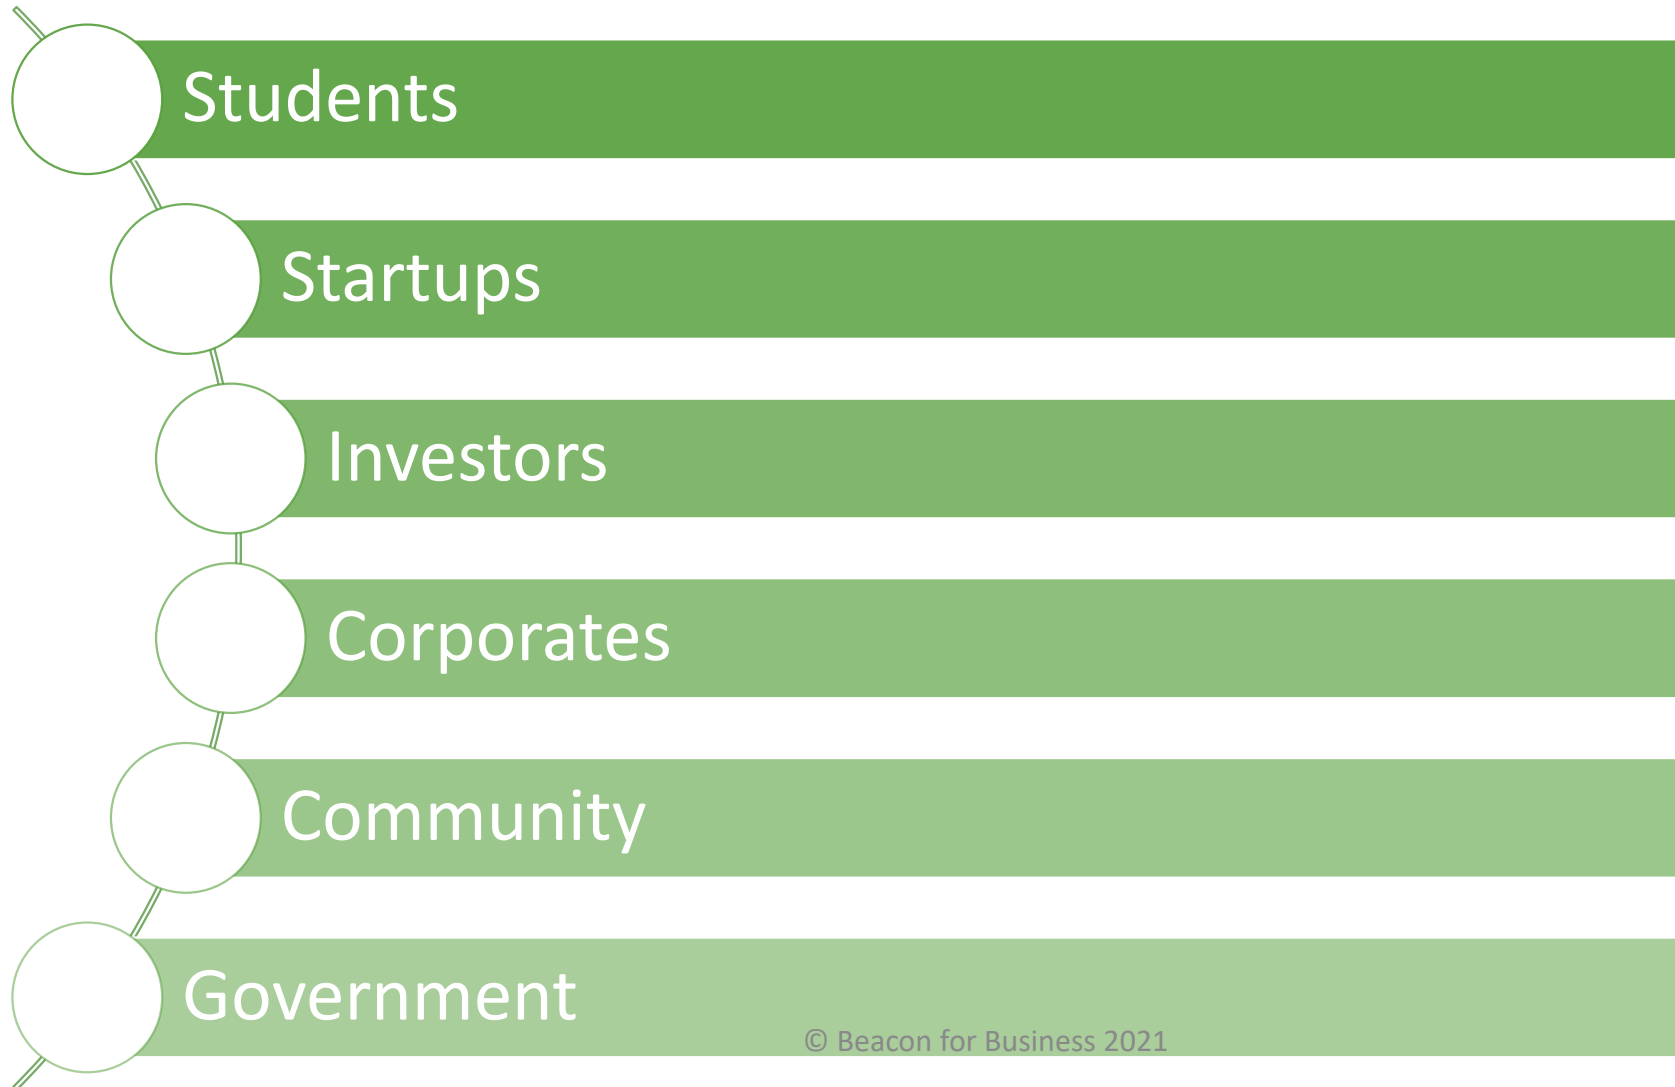

The Mission

The Process

Clients

Startup Eligibility

Profit or Not for profit?

How soon can the product be commercialized?

Is the business in the early stages of business development?

Does the technology, product or service have the potential to make an impact in the marketplace or community?

What is the potential for rapid company growth and the associated job creation?

Will the business stay local?

Can the business pay for the services?

How will the business contribute to helping the innovation centre achieve it's objectives?

Operational Challenges

Access to
operational
funding

Access to seed
funding for
startups

Fluctuations in
occupancy levels

Capacity of and
staff turnover

High infrastructure
costs

Key Performance Indicators
