

Title: The Nigeria Startup Bill State Adoption Plan

Duration: August 2022 - December 2022

NSB State Adoption Lead - Tracy Okoro

NSB State liaison Officer - Toyin Bamidele

Introduction

The Nigeria Startup Bill State Adoption Plan is the framework outlining activities and commitments required to help each state adopt the NSB. Since we know that every state is unique, all activities and obligations are tailored to each state as they deem fit. The state adoption team will be responsible for following up and working with state representatives and stakeholders in implementation, monitoring, and reporting. The NSB secretariat will also be on the ground to help with engagements, drafting, and all other necessary actions required or needed by the state. At the secretariat, we drive the big tent approach and as such will encourage the states to apply the same as it ensures that all actors are carried along and that they play their roles.

The State Ecosystem Needs Assessment -

This is a preliminary assessment that each state needs to do in order to

- Assess the current digital ecosystem of the State.
- Produce a digital resource map of the State.
- Assess the existing gaps.
- Provide a baseline reference for the state.

At the end of the ecosystem assessment, we would like to answer the following questions.

1. What is the market potential for tech-driven, innovative businesses in the State?
2. How can the Government of the State support the cultivation of talented founders and talents?
3. How can the Government of the State expand access to financial capital for tech-driven businesses?
4. Is the State Government ready to cultivate a policy and regulatory environment which is conducive to innovation?
5. How does the State Government plan to build or establish the infrastructure necessary to support innovative businesses?
6. How does the State Government plan to support and sustain a culture of innovation and entrepreneurship?
7. What are the State government plans for upskilling talents in the state?
8. How is the state currently consuming or leveraging innovation and technology?
9. What is the pulse of the youth population? Are they interested in developing technology or building solutions?
10. Is there an existing framework or plan for how the state wants to develop the state using innovation and technology?

The Tentative work plan and Timelines

Event	Activities	Responsible	Status	Start Date
Phase 1 State Ecosystem Engagement		Who is responsible for the action	Where are we	2022
Ecosystem Needs Assessment	Research and Ecosystem validation	Tracy/Toyin/State Rep	Not started	3-Sept 2022

State Stakeholders and Ecosystem town hall (Can this be led by the governor in each state? He typically shows up and makes a speech	- Identify and collate list of state ecosystem stakeholders, anchor agencies, etc. - Prepare briefing materials for state ecosystem stakeholders meeting - Prepare a deck that communicates the process, timelines, what's needed, etc. - Toolkit of sorts with the key points they need to know - Email templates they can use to connect us with other stakeholders. - Plan for a big media splash to launch the state or reinforce the state's stand on the NSB - Feedback process (maybe a simple google form? A Whatsapp group?)	Tracy/Toyin/State Rep	Not Started	Sept/Oct
---	---	-----------------------	-------------	----------
